

Series 72/73 Teflon Seated
Torques (Inch-Pounds)

Shutoff Pressure	2"	2½"	3"	4"	5"	6"	8"	10"	12"
150 PSI Shutoff	165	240	375	563	875	1125	1875	3113	5625

Notes:

1. This chart is to be used as a guideline only.
2. These torque ratings do not apply to every possible service criteria, which may effect seating and unseating torque.
3. Torque values are applicable to Flow Line Series 72/73
4. These torques are actual, safety factor have not been applied.
5. Dynamic torque should always be a consideration when sizing valves with higher differential pressures.
6. For 3 way tee assemblies multiply the above torques by 1.5
